

## APPENDIX G: USER GUIDE

1. For direct installation into the machine:
  - a. Download the RPIMS folder and extract it onto your machine.
  - b. Open Anaconda Prompt if you have installed it already, and cd into rpims\_webapp
  - c. Create a virtual environment called fyp and activate it.
  - d.

```
conda create -n envname python=3.9.17 fyp  
conda activate fyp
```

- e. Download the packages through requirements.txt in conda
  - f.

```
pip install -r requirements.txt
```

- g. Setup by migrating and run the server using the following commands

```
python manage.py makemigrations  
python manage.py migrate  
python manage.py runserver
```

2. To use the online host,
  - a. Simply click the “Open App” button in Heroku OR enter [fyp2-677b5c20cb6e.herokuapp.com/](https://fyp2-677b5c20cb6e.herokuapp.com/) in the browser.
